COURSE SUMMARY

This two-day course provides leaders with the understanding and tools they need to effectively lead Agile and Scrum teams. The course provides a brief overview of Agile Values and Principles, lean concepts, and details on the Scrum framework. Leaders will understand common Agile approaches, why they are used, and how to support teams to master them. The course also explores recommended metrics and reports for Agile teams and how to avoid asking teams to report on the wrong things.

This course addresses the key leadership traits needed to be effective with Agile and how to create a receptive environment for Agile to succeed. It also explores in detail how to successfully facilitate a transition from waterfall to Scrum in an organization. Participants will learn how to support, coach and lead Agile teams to maximize the benefits of Agile in their organization.

WHO SHOULD ATTEND

This course is intended for executives, PMO leaders, managers, stakeholders and others who play a leadership role in an Agile environment or are responsible for helping Agile teams succeed.
