

AGILE, SCRUM & KANBAN FOR TEAMS

ONLINE & SELF-PACED COURSE

COURSE SUMMARY

The Agile, Scrum and Kanban training for teams is designed as a self-paced online training course for agile team members, Product Owners and Scrum Masters. The benefits of the online approach is that participants have the flexibility to take the course and complete the exercises on their own schedule and from whatever location they want.

WHO SHOULD ATTEND

This course is best suited to new Agile teams including the developers, business analysts, architects, testers, Scrum Masters and Product Owners. Key team stakeholders such as project managers, managers and subject matter experts will also benefit from attending. Participants will be ready to roll up their sleeves and hit the ground running with Agile ways of working.

COURSE OUTLINE

- Overview of Agile, Scrum and Kanban
- Common Agile Concepts and Practices
- Using Kanban
- Mastering the Scrum Framework
- Creating Your Product Backlog
- Creating Effective User Stories
- Planning in Agile
- Course Closeout

KEY LEARNING OUTCOMES:

Following this training, participants will be able to:

- Summarize what Agile means and how it differs from traditional approaches
- Describe the benefits of Agile approaches
- Understand the terms and practices associated with Agile frameworks
- Understand the roles on an Agile team and what is expected of each role
- Design a Kanban board for a department
- Describe the steps to plan and initiate a project using Scrum or Kanban
- Describe the different levels of planning in Agile
- Understand what happens in the events in Scrum
- Create a product backlog
- Demonstrate how to create effective user stories
- Contrast Kanban and Scrum and when to use each approach

DETAILS

- Designed to be completed by groups or cohorts of up to 30 participants
- Online training is complemented with two synchronous sessions with the instructor (via Zoom) to answer questions and complete team exercises
- Each cohort of the training starts and finishes on the same day
- This course takes approximately 12-14 hours to complete
