Agile Scrum and Kanban for Teams

1 \$99 \$99

The Agile, Scrum and Kanban for Teams is an online, video based training course that allows you to learn about agile ways of working on your own schedule. The course helps you understand agile from a team member's perspective. This course provides an in-depth look at the most common agile concepts and practices in use today. You will also get a comprehensive understanding of Scrum and Kanban, the two most popular Agile Frameworks today. This course has been used by hundreds of students to allow them to understand agile ways of working, how to speak the language of agility and how to hit the ground running with Agile, Scrum and Kanban.

## ONLINE & SELF-PACED COURSE

### COURSE SUMMARY

---

The Agile, Scrum and Kanban training for teams is designed as a self-paced online training course for agile team members, Product Owners and Scrum Masters. The benefits of the online approach is that participants have the flexibility to take the course and complete the exercises on their own schedule and from whatever location they want.

### WHO SHOULD ATTEND

---

This course is best suited to new Agile teams including the developers, business analysts, architects, testers, Scrum Masters and Product Owners. Key team stakeholders such as project managers, managers and subject matter experts will also benefit from attending. Participants will be ready to roll up their sleeves and hit the ground running with Agile ways of working.

### COURSE OUTLINE

---

- Overview of Agile, Scrum and Kanban
- Common Agile Concepts and Practices
- Using Kanban
- Mastering the Scrum Framework
- Creating Your Product Backlog
- Creating Effective User Stories
- Planning in Agile
- Agile Tools, Templates and Resources

### KEY LEARNING OUTCOMES:

Following this training, participants will be able to:

1. Summarize what Agile means and how it differs from traditional approaches
2. Describe the benefits of Agile approaches
3. Understand the terms and practices associated with Agile frameworks
4. Understand the roles on an Agile team and what is expected of each role
5. Design a Kanban board for a department
6. Plan and initiate an agile project
7. Understand the events in Scrum and what happens in each
8. Create a product backlog
9. Demonstrate how to create effective user stories
10. Contrast Kanban and Scrum and know when to use each

### DETAILS

---

- Designed to be completed individually on your own schedule
- For large groups, online training is complemented with schedule sessions with an instructor (via Zoom) to answer questions
- This course takes approximately 10 hours to complete
- Participants earn 10 PDUs or SEUs
